

Kairos Library sample

This short file shows how a learning source works in Kairos.

A learning source is a file you read, like a guide or a glossary.

It is not a lesson. Lessons come later and can point to a page here.

Before Kairos keeps a file for offline reading, it checks that the file has the same size and the same fingerprint as the Library's record.

Written for Kairos in September 2026. Free to share with the app.
